

Autism Ontario OAP Service Navigation Program – Information Sessions

Information Session Descriptions:

OAP Orientation: Do you have questions about the new Ontario Autism Program? Autism Ontario can help answer your questions and support you in navigating the changes in the system. At this workshop, you will learn what these changes are, how they affect you and your family, and what a Childhood Budget is. You'll also get to know Autism Ontario and their new Service Navigation program, designed to help families navigate the OAP and Childhood Budget, find qualified providers, learn about the autism supports and services in your region, and have opportunities to connect with other local families to share knowledge, provide support, and build community.

Childhood Budget: Do you have questions about the OAP Childhood Budget process? Have you received a Childhood Budget form? Autism Ontario's network of Service Navigators is designed to ensure families don't have to navigate alone. At this workshop, Service Navigators will provide a step-by-step guide to the Childhood Budget, including how to understand and fill out your Childhood Budget form. This workshop is available to all parents and caregivers, and is designed to empower them with information. Whether your child is registered for the Ontario Autism Program or not, whether you are waiting for a Childhood Budget or your child is currently receiving behavioural services, this Childhood Budget workshop will walk you through what each section means for you and your family.
